Art Unit: 3621

REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art McCarty, Johnnie discloses a system for protection software for unauthorized use. Watanabe, Hiroshi discloses a system for preventing an authorized use of a software. IBM technical disclosure bulletin discloses a copy protection method that uses identifier data unique to a storage media where the protected program is installed. However, neither MacCarty nor Watanabe and IBM technical disclosure bulletin singularly or in combination fails to anticipate or render obvious the recited feature: As per claims 1, 16, 24 and 40 " using information supplied from the software to determine if the dynamic key assigned to the software is present in the security device, and if so, generating the encryption key within the security device using the dynamic key; and authorizing use of the software on the computer system by sending the encryption key from the security device to the computer system for decryption of the software".

As per claims 22 and 39" sending the initialization vector to the security device, in the security device, using the initialization vector and the stored dynamic key to generate the security key and communication key if the dynamic key assigned to the software is present in the security device, encrypting the security key using the communication key, sending the encrypted security key to the computer system as a response using the communications key in the software package to decrypt encrypted security key, and using the security key to decrypt the encrypted software of use on the computer system".

Application/Control Number: 10/028,581

Art Unit: 3621

Conclusion

Page 3

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 703 305-3987. The examiner can normally be reached on 6:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703 305-9769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
